

Trung Tran

.NET Developer

SAIGON TECHNOLOGY
YOUR SUCCESS IS OUR MISSION

OVERVIEW

I've been a full-stack software engineer for more than 3 years. I've worked with many types of applications from the web, mobile, and desktop apps to integration or low-code applications. I'm a Techaholic with so much passion for software technology. I love applying modern technologies to solve software problems and building large-scale applications' architectures.

TECHNICAL PROFICIENCIES

eFinder .NET Backend – Open source project

Developer & Maintainer, 2020 - Now

Project description

- About eFinder: eFinder is an open-source file manager for the web, written in JavaScript using jQuery UI. Creation is inspired by the simplicity and convenience of the Finder program used in the Mac OS X operating system.
- About eFinder.Net.Core: this is an eFinder backend connector with less magic code and more compatibility. This enables .NET Standard 2.0 projects to easily integrate eFinder functionalities

Responsibilities

- Main developer and maintainer of the project

Technologies

- .NET Core
- File Management System, File Manager

Room reservation app for University

Team Leader and Developer, 2020
