

THANG LE VAN

.NET Developer

SAIGON TECHNOLOGY
YOUR SUCCESS IS OUR MISSION

OVERVIEW

I have more than five-years of experiences in C#,PHP,.NET Framework, SQL Server, and JavaScript Technologies. I have been experienced in Front-End Development with HTML5, CSS3, Angular JS, React JS, and Bootstrap for two-years. I focus on collecting the requests, implementing, fixing bugs before release packages, researching and applying new techniques, and supporting my team members as well. I always advise my team to work with the latest technologies. I also have a knowledge of web responsive using Microsoft technologies, I have knowledge of mobile apps and have many third party service such as: Amazon, SVN, React Native, and Ionic.

- DevExpress 2010

Interview online – US

Developer, 2022

Project description

- Online recruitment project. Here users can create jobs, add members, invite candidates and return results to candidates via email.

Responsibilities

- Team manager with 5 members
- building the project from scratch for more than 1 year.
- maintenance and develop as client requirements

Technologies

- C#,net core,ABP Framework, SQL server,web RTC

Transportation Management system Project – US

Developer, 2020-2021

Project description

- warehouse project.
- project to connect with other systems and connect to the electronic scale

Responsibilities

- Maintain and develop new features as client requirements about connecting API

Technologies

- C#,Winfrom,sql server

Transportation Management system Project – US

Developer, 2020

Project description

- accounting project

- Calculate driver's salary connect to many other systems

Responsibilities

- Maintain and develop new features as client requirements about connecting API

Technologies

- C#,MVC,sql server

Sharepoint Project – US

Developer, 2019

Project description

- timekeeping and diary work

Responsibilities

- building the project from scratch

Technologies

- Reactjs,sharepoint

SMS advertising project – VN

PHP Developer, 2019

Descriptions

- SMS advertising project

Responsibilities

- building the project from scratch
- maintenance and develop as client requirements

Technologies:

- Fw codeigniter ,PHP,redis , Queues Beanstalkd

Management CRM system – VN

PHP Developer, 2019

Descriptions

- Developing the company's call center

Responsibilities

- Maintain and develop new features as client requirements

Technologies:

- C#,PHP, codeigniter Framework, Kendo,mySQL ,SQL server,mongoBD

Extension chrome – VN

PHP Developer, 2018

Descriptions

- chrome extension about call center

Responsibilities

- building the project from scratch

Technologies:

- javascript

zendesk plugin – VN

PHP Developer, 2018

Descriptions

- Plugin about call center

Responsibilities

- building the project from scratch

Technologies:

- javascript,PHP

ODOO plugin – VN

PHP Developer, 2018

Descriptions

- Plugin about call center

Responsibilities

- building the project from scratch

Technologies:

- Python

E-Commerce Web Application – VN

PHP Developer, 2018

Descriptions

- The E-commerce web application

Responsibilities

- Maintain and develop new features as client requirements

Technologies:

- PHP, codeigniter Framework, Kendo,mySQL

Cosmetics management systems – JP

C# Developer, 2017

Descriptions

- Cosmetics management systems

Responsibilities

- Maintain and develop new features as client requirements

Technologies:

- C#,asp.net,winform ,Kendo,AG grid ,SQL server

Excel service – JP

C# Developer, 2017

Descriptions

- General calculation of excel files

Responsibilities

- building the project from scratch

Technologies:

- VBA ,VB.net
