  - Object-oriented methodology, System Analysis and Design
  - Multi-threaded programming
  - Single Page Application (Web-based), RESTful Web API
  - Front-End development: Angular 4, JQuery, HTML5, CSS3, Bootstrap.
- **Tools:** Visual Studio, Visual Studio Code, Git, Sourcetree, MS SQL Server

## PROFESSIONAL EXPERIENCE

### Healthcare – United States

*Developer, Jul 2019 – Present*

Project description

- Healthcare

Responsibilities

- Implement user stories, fix bugs & review code
- Daily report tasks
- Improve system performance

Technologies

- ASP.NET MVC, LINQ, Entity Framework, Rest API, SQL Server, Javascript/JQuery, Dapper

### ERP

*Team Leader, Apr 2018 – May 2019*

Project description

- ERP

Responsibilities

- Implement Common Feature
- Implement user stories

- Lead team (12 members) to Implement user stories
- Create high level design, review code

#### Technologies

- .NET Core 2, LINQ, Entity Framework, Rest API, SQL Anywhere, Angular 4, Unit Test with NUnit

### **ECOUNT ERP – Korea**

*Developer, Feb 2016 – Apr 2018*

#### Project description

- ERP

#### Responsibilities

- Upgrade old framework (Web Form) to new framework (MVC)
- Develop new function
- Fixed Bugs
- Apply common in Javascript, SQL and Code

#### Technologies

- ASP.NET MVC, LINQ, MS SQL, Javascript, JQuery, MySQL

### **Real Estate Management – Singapore**

*Developer, Jun 2013 – Feb 2016*

#### Project description

- Real Estate

#### Responsibilities

- Upgraded and maintain old system from .Net 1.1 to .Net 3.5.
- Collected requirements and implemented new user stories.
- Deployed system and supported users.

#### Technologies

- ASP.NET MVC, LinQ to SQL, JQuery, Bootstrap, HTML5, MS SQL, Crystal Report 2008.
